**Saturday, June 2, 2018 – 6pm**

**Fleet Science Center, Balboa Park**

**What:** *Busting the Myths of Wine*, the Fleet Science Center's 2018 fundraiser. Co-chairs Gary Phillips and Gary Parker of the WineSellar & Brasserie are creating a spectacular evening featuring fine wines paired with a sumptuous multi-course dinner designed by renowned chef Andrew Spurgin.

**Why:** This fundraiser will directly support the Fleet Science Center's education programs, exhibits and community outreach. Together, we work to create a San Diego where every child can access and be inspired by the wonder of science, develop their skills and talents in a dynamic learning environment and live in a community rich in the science experiences that build and support their and the region's scientific identity.

**Details:** 200+ guests will begin the evening with a reception featuring live entertainment, a spectacular silent auction of rare and unique wines and extraordinary experiences. The competitive can try their hand at the *Wine Ring Toss*, while the curious can increase their wine knowledge while debunking wine myths. The reception will be followed by a seated dinner with exquisite food and fabulous wine pairings. Guests can support the Fleet Science Center by bidding on live auction experiences as they enjoy extraordinary desserts.

Our first event in 2017 generated over \$250,000 for the Fleet and its robust STEM programs. We are excited to raise more funds this year to continue to connect people of all ages to the power and possibilities of science.

**Tickets: \$275** (Tax deductible portion: \$150)

**Tables: \$2,500 & \$5,000**

### **RAISE THE PADDLE FOR SCIENCE**

All event attendees can raise their paddles to make it possible for a class of students to visit the Fleet or fund the next dynamic exhibition the Fleet brings to our San Diego region. Your generous support can help fund the *52 Weeks of Science* outreach program or one of the next IMAX films we bring to the Heikoff Dome. Your gift will help the Fleet continue to connect people of all ages to the power and possibilities of science.
